DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 12-15 are rejected under 35 U.S.C. 102(b) as being anticipated by EP 312655 (Desnijder).

Desnijder discloses a crop chaffer (23) including:

- a plurality of coterminously positioned removable chaffing elements (94) with element frames (96)
- a frame (91)
- a hinge pivot (103)
- an alignment notch (102)
- a spring (111) that urges the front end of the chaffing elements to rotate away from its seated position within the frame.

The chaffing elements are inherently individually removable because although it would require tools.

Allowable Subject Matter

3. Claims 1-11 and 16-17 are allowed.

Art Unit: 3671

4. The following is an examiner's statement of reasons for allowance: In, claims 1-11 and 16-17, the limitation jet was given the meaning cited in the amendment filed 10/1/03. These claims with this definition are not found in the prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Response to Arguments

5. Applicant's arguments filed 10/1/03 with respect to claims 12-15 have been fully considered but they are not persuasive.

Claim 12 states, "a plurality of coterminously positioned individually removable chaffing elements." This claim does not contain any other limitations in the body. The claim merely requires the chaffing elements be individually removable. It does not say that the elements are removable with the use of no tools or that they are easily removable. Applicant is arguing more than is being claimed.

Desnijder discloses individual chaffing elements that are individually removable by uncoupling them from the subframes. This meets the limitation of claim 12. Claim 12 does not limit how the chaffing elements are individually removable.

Conclusion

6. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

Art Unit: 3671

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
